When the situation are against animal

# Butacol

Butaphosphan 100 mg  
& Cyanocobalamin 50 mcg/ml

**Dosage :**

Cattle, horses: 10-25 ml per animal

Foal, calves: 5-12 ml per animal

Sheep, goats: 2.5-8 ml per animal

Lambs: 1.2-2.5 ml per animal

Pigs: 2.5-10 ml per animal

Poultry: 0.5-1 ml per bird

*aids faster recovery*

**Presentation : 30 & 100 ml**

*Protecting the valuable ....with the better coverage*

# Cefbec<sup>3.0</sup> <sup>4.5</sup>

Cefoperazone 2000/3000mg.  
& Sulbactam 1000/1500mg. Injection

### **Unique features :**

- **Safe in pregnancy**
- **Crosses Blood Brain Barrier**
- **Exclusively active against Pseudomonas**
- **More bioavailability than ceftriaxone as less serum protein binding**

### **Administration & Dosage :**

By I/M & I/V use only.

Large Animals : 5 - 10 mg / Kg. Body wt.\*

Small Animals :10 - 15 mg/ Kg. Body wt.\*

(\* 3 to 5 days)

Recommended drug  
for Mastitis in  
lactating animals

*for digestive upsets due to poisoning,  
acidosis/grain overload, excess ammonia or enteritis.*

# LIQUID COALzen

Activated Charcoal 300mg & Osmotic Laxative 300mg/ml

SUSPENSION

Poisoning due to organic chemicals,  
insecticides pesticides, heavy metals etc.

Ruminal impaction, Ruminal acidosis

Bloat & Tympany

Drug Overdose

**Cow, Buffalo & Horse:**

1-2 ml./ kg. body wt.

(500 ml. as one dose)

Calf, Pig, Sheep & Goat :

2 ml./kg. body wt..

Dog & Cat : 3-4 ml./kg. body wt.

Repeat dose after 12 hours.

**Poisoning :** 3-4 times of suggested usage

& repeat after 4-6 hours for 24 hours

**Presentation : 100, 200 & 500ml. Susp**

*Value in recovery  
from parasitic burdens, injury, surgery, illness & in old age.*

# Cydomin

Each ml contains:	
Thiamine Hydrochloride (Vitamin B1)	50mg
Pyridoxine Hydrochloride (Vitamin B6)	50mg
Cyanocobalamin (Vitamin B12)	500mcg
Benzyl Alcohol (As Preservative)	1.5% v/v
Water For Injections	q.s.

Non-specific anorexia, Convalescence,  
Debility & General Weakness  
Mastitis, Indigestion, Diarrhea,

## **DOSAGE AND ADMINISTRATION**

Large Animals : 10-15 ml,  
Small Animals : 5 - 7 ml

**Presentation : 100ml.**

Ectoparasiticide for the control of ticks, flies, lice and mites on cattle, sheep, poultry and dogs.

# Cypotick-EC

Cypermethrin 10% w/v

***Kills single  
and multi-host***

**Dosage :**  
Add 1 to 2 ml. liquid  
in 1 ltr water and apply the  
prepared solution thoroughly  
on the Animal Body

Repeat as required

**Presentation : 15 & 50 ml.**

*In allergic conditions*

# Dalrup

Chlorpheniramine Maleate 10mg/ml Injection

Skin allergies  
(Acute & Chronic Urticaria)

Allergic Rhinitis & Conjunctivitis

Local & Generalized Allergies

Prevention of Anaphylactic Reactions

Co-prescription with Antibiotics

**ECZEMA | INSECT BITE | ASTHMA**

**Dosage & administration:**

Large animals: 3-5 ml by I/M route only

**Small Animal Dosage**

Dogs • 4-8 mg/dog up to a maximum dose of 0.5 mg/kg

Cats • 2 mg/cat 0.5-2 ml by I/M route only

The **power** of two

# Emiclox

Ampicillin 2000 mg. &  
Cloxacillin 2000 mg. Injection

**Mastitis & Metritis | Pneumonia | Enteritis**

**Retained Placenta | Systemic & Local Infections**

**Haemorrhagic Septicaemia | Pre & Post-operative Care**

**Dosage :**

**Large Animals :** 10 - 20 mg. /kg. body wt.

**Small Animals :** 5-10 mg. /kg. body wt.

**Presentation : 4g Vial**

**Knock out Gram +ve, Gram -ve bacteria,  
mycoplasma & their mixed infections ....**

# Enolox

Enrofloxacin 100 mg./ml.

- Total spectrum coverage
- Effective at low dose
- High tissue distribution
- Peak serum level achieved within 1-2 hrs.

## **Dosage**

Calves, Cattle,  
Sheep & Goat  
1 ml. per 20 - 40 kg /  
body weight for 3 to 5 days  
Swine :  
1 ml. per 20 -40 kg/body weight

**Presentation : 100ml. Vial**

**Knock out Gram +ve, Gram -ve bacteria,  
mycoplasma & their mixed infections ....**

# Enolox-DS

Enrofloxacin 200 mg./ml.

- Total spectrum coverage
- Effective at low dose
- High tissue distribution
- Peak serum level achieved within 1-2 hrs.

**Dosage**  
1 ml. per 40 -80 mg/ kg  
body weight.

**Presentation : 30 & 100ml.**

# Enolox

Enrofloxacin 10% Oral Solution

## Dosage

### For oral administration: Calves, goats and sheep:

Twice daily 10 ml per 75 - 150 kg  
body weight for 3 - 5 days.

### Poultry:

1 litre per 1500 - 2000 litres of  
drinking water for 3 - 5 days.

### Swine:

1 litre per 1000 - 3000 litres of drinking  
water for 3 - 5 days.

Effectiveness for anaemia treatment in livestock

# Fenitol

Supplement of Iron, Folic Acid, Vitamin B12  
fortified with Copper, Cobalt, Essential &  
Non Essential Amino Acids **Liquid**

#### **Dosage :**

Cattle: 30-40 ml. daily.  
Sheep/Goat: 10-20 ml. daily.  
Swine 15-20 ml. daily.  
Poultry:  
Chicks:  
50 ml./per 100 birds.  
Grower/Layer/Broiler:  
100-150 ml./per 100 birds.

Haemolytic anemia caused because of protozoal diseases i.e. Trypanosomiasis, Babesiosis, Anaplasmosis.

#### **Iron deficiency anemia**

Treatment, prevention & control of anemia of nutritional origin, pregnancy or in young animals.

#### **Vitamin B12 deficiency**

#### **Poor diet.**

Improvement of body condition & immunity

#### **Folic Acid deficiency.**

Improved productivity.

Bring **Animal** into Heat

# Heatzen

Chelated trace minerals & Coated Vitamins fortified with Iodine Heat Inducer Bolus

**Infertility (Non - Pathogenic).**

**Anoestrus - Suboestrus - Silent heat.**

**In Repeat Breeding.**

**Delayed meturity in heifers.**

**Prolonged post-partum anoestrus condition.**

**Dose :**  
One Bolus daily for 7 days

**Presentation : 1 x7 Bolus**

When there's need to bring  
Animal into heat

**Glycine Chelated Minerals**

**Heatzen** 

**Heat Inducer Powder**

Composition :

Glycine Chelated Minerals with  
fortified Omega 3, Omega 6, Fatty  
Acid along with essential Vitamins

Storage : Store in a cool & dry place.  
Protect from light.

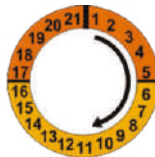

Dosage : 25-50 gm. daily for 21 days.  
Keep out of reach of children.

Induce & Regulates ovulatory  
oestrus cycles.

Normalises Function of Hypothalamus,  
Pituitary, Ovarian & Uterine axis.

Stimulates the ovarian function &  
ensures oestrus & timely ovulation.

Bring the animal in to Pronounced  
ovulatory heat within 1-2 oestrus  
cycles.

**21 days  
Therapy  
for desired  
result**

**BETTER CONCEPTION - IMPROVE FERTILITY**

**Presentation : 500 gm**

## *Treatment of acute hypophosphataemia*

# Hi-Fos

Sodium Acid Phosphate 40.3 % w/v Injection

**Dosage :** (FOR IM/IV Use)

Large Animal :

5- 10 ml. for alternate days

Small Animals :

2 - 5 ml. daily can be adjusted according to the phosphorus need of the animal.

It is advisable to administer half the dose by S/C route in several places

### ***Effective to treat metabolic disorders such as***

- ◆ Post parturient Haemoglobinuria
- ◆ Hypophosphataemia
- ◆ Ketosis & Milk Fever

**Presentation : 30 ml. Vial**

*Treatment of acute hypophosphataemia*

# Hi-Fos-M

Sodium Acid Phosphate 400 mg.&  
Methylcobalamin 100 mcg. /ml. Injection

**Dosage :** (FOR IM/IV Use)

Large Animal :

5- 10 ml. for alternate days

Small Animals :

2 - 5 ml. daily can be adjusted

according to the phosphorus need of the animal

It is advisable to administer half the dose by S/C route in several places

**Under developed Genitalia, Delayed Maturity**

**Anoestrus and maintenance of Pregnancy**

**To maintain steady & higher milk production**

**Presentation : 30 ml. Vial**

# Hiprost

Hydroxyprogesterone  
Caproate 750 mg. / 3 ml.

**Helps in preparation of uterus for implantation of fertilized ovum**

**Threatened, Habitual & Early / Late Abortions**

**Maintenance of Pregnancy**

**Prolapse of Uterus & Vagina**

**Dosage :**

IM route only Habitual abortion in early pregnancy : 750 mg.

**IM after 1.5 month of pregnancy, to be repeated 4 or 5 times  
at 10 days interval**

Repeated breeders with weak corpus luteum 500 mg. or 750 mg.  
IM to be followed for 3 weeks

**Prolapse of Uterus 750 mg. for two days**

**Induction of Oestrus 500 mg., if not responded repeat after 10 days**

**Presentation : 3ml. Dispo Pack**

Prevent/Treatment **Kitosis**  
& Maintain the Energy/Glucose Level

# Ketoscare

LIQUID

Propylene glycol, Nicotinamide &  
Gluconeogenic Phytochemical Additives

## Prevention of Kitosis is via nutritional management

- Optimizes the dry matter intake.
- Helps in fast recovery from ketosis.
- Helps to minimize formation of ketone bodies.
- Improve the post calving health & production.
- Increases availability of Energy/Glucose Level.
- Provide Glucose/Energy for lactation & body maintenance.
- Helps to bring back animal to feed & optimum milk production.

### Dosage :

Cattle/Bufalo : 100 ml. to 200 ml. oral once daily

**Presentation : 1 Ltr**

Restore Liver health

**Debility and Weakness**

# LIVOZEN

Choline Chloride 2000 mg., Liver Extract 40 mg.,  
Protein Hydrolysate 50 mg., Yeast Extract 40 mg.,  
Inositol 35 mg., Niacin 24 mg., DI-Panthenol  
2.5 mg. & Vit. B12 - 0.75 mcg / 10 ml.

**Dosage :**

Calf, Sheep and Dog :

3-5 ml daily for 7-10 days

Cattle, Horse and Camel :

20 ml daily for 7-10 days.

**Poultry :** Chicks : 0.5 ml per litre of drinking water  
Growers and Broiler

0.5 ml per litre of drinking water

Layers and Breeders

1.0 ml per litre of drinking water.

**Presentation : 200 & 500ml, 1 & 5 ltr.**

Enhances Liver function & health

# Livozen-Forte

Liver Extracts with Multivitamin, Choline Chloride,  
Enzyme and B-Complex

## **Dosage :**

Calf, Sheep and Dog  
3-5 ml daily for 7-10 days  
Cattle, Horse and Camel  
20 ml daily for 7-10 days.

## **Poultry :**

Chicks  
0.5 ml per litre of drinking water  
Growers and Broiler  
0.5 ml per litre of drinking water  
Layers and Breeders  
1.0 ml per litre of drinking water.

**Presentation : 200 & 500ml , 1 & 5 Ltr**

*Add Zing*  
To the **Treatment**  
of **MASTITIS** with

# MastiForte

- ★ Restores normal milk pH
- ★ Ensures complete recovery with normal milk yield
- ★ No relapse observed
- ★ Stop bleeding in Milk

**Dosage & Administration :**

30 g. twice daily orally by mixing in Jeggery or as an electury for 5 days

**Presentation : 60 gm**

**A logical partner of antibiotic therapy**

# Melzen

Meloxicam 5 mg. / ml Injection

The Safest **NSAID**

Powerful Analgesic

**Dosage :**

By parental route- IM only

**As Antipyretic & Antiexudative :**

In fever, Pneumonia, Mastitis,

Prolapse & surgery :

30 ml./300 kg bwt.

**As Analgesic :**

Cattle, Buffalo, Pig :

15 to 18 ml./300 kg bwt.

Calf, Sheep, Goat : 1 ml./10 kg bwt.

Horse : 30 ml. / 250 kg bwt.

**Presentation : 100 ml. Vial**

REINJECT LIFE IN YOUR ANIMAL

IN INFLAMMATION,  
PAIN & FEVER

# Melzen-P

Meloxicam 5 mg. &  
Paracetamol 150 mg. / ml Injection

Additional anti-exudative

Effective control of endotoxins

Long acting effect

Safe for young animals

Least pain on administration

**Dosage :**

By parental route- Intramuscular only

**As Antipyretic & Antiexudative :**

In fever, Pneumonia, Mastitis,

Prolapse and surgery : 30 ml./300 kg bwt.

**As Analgesic :**

Cattle, Buffalo, Pig : 15 to 18 ml./300 kg bwt.

Calf, Sheep, Goat : 1 ml./10 kg bwt.

Horse : 30 ml. / 250 kg bwt.

**Presentation : 30 & 100ml. Vial**

# Melzen-P

Meloxicam 100 mg. &  
Paracetamol 1500 mg. Bolus

Combined NSAID therapy

Dosage :  
Cattle, buffalo-2 bolus/400kg. of body weight  
Once a day

**Presentation : 10 x 4 Bolus**

Gives comfort in associated cases of fever

# Nimospas

Nimesulide 100 mg,  
Pitofenone 2 mg. & Fempiverinium 0.02 mg / ml. Injection

**Dosage :**  
Large Animal  
20 - 60 ml./ Kg  
Body Weight  
Small Animal :  
5 -15 ml. / kg  
Body Weight

Acute mastitis,  
Acute respiratory infection  
Musculoskeletal disorders  
Relief of pain associated with colic  
In combination with antibiotic therapy

**Presentation : 30 ml. Vial**

Fast acting combination

.....For speedy results

# Nimosid

Nimesulide 400 mg., Paracetamol 1500 mg.  
& Chlorzoxazone 1000 mg. **Bolus**

**Dosage :**

Small Animals :

1/2 - 1 bolus

Large Animals :

2 - 4 bolus for 3 - 5 days

or As per examination of Veterinarian

**Presentation : 10 x 4 Bolus**

Superior Analgesic,  
Anti-inflammatory  
& Antipyretic

# Nimosid-P

Nimesulide 100 mg &  
Paracetamol 150 mg / ml. Injection

**Dosage :**  
2- 4 mg./ Kg Body Weight

**Presentation : 30 & 100ml. Vial**

An adjunct to antibiotic  
treatment to overcome stress

# Nuroen

Mecobalamin 500 mcg., Pyridoxine HCl. 50 mg.  
& Niacinamide 50 mg. / ml.

**Neuropathic Pain**

**Liver distress**

**Proper Cell Growth**

**Anaemia**

**Nervine Disorders**

**Mouth Ulcers & Stomatitis**

**Dosage**

**Cow, Buffalo, Horse : 5 -10 ml.**

## Dosage Liverstock :

Cattle, Buffaloes, Horses & Camels	50 ml twice daily
Calves, Pigs & Foals	20-25 ml twice daily
Sheep & Goats	15-20 ml twice daily

## Poultry : (Per 100 birds)

Chicks	5 ml per day
Growers	10 ml per day
Layers/Broilers	20 ml per day

## Fish/shrimp : (Per kg feed)

Upto 10 weeks	20 ml
11 weeks and above	50 ml

Higher dosage may be used  
as directed by your veterinarian.

**Presentation: 200/500ml & 1 Ltr.**

*Difficulty in calving....  
..loss of production*

# Utrozen

ECBOLIC & UTERINE CLEANSER

**Dosage :**

Cow, buffalo & Mare :  
In case of ROP 100 ml. twice  
onfirst day, followed by 100 ml.  
once a daily for the next three days.  
In other conditions 50 ml. twice daily

Ewe, doe & sow :  
50 ml. twice on first day, followed by  
25 ml. for the next three days.

Retention of placenta (ROP)

Uterine infections like metritis, pyometra etc.

Irregular lochial discharge

Delayed involution of the uterus

# Complete Nutritional Feed Supplement For Pregnant Animals

# ZENLITE

## Complete Nutritional Feed Supplement For Pregnant Animals

**Avoid Pregnancy associated problems**

**Helps in Udder development**

**Prevention of milk fever, ROP & Prolapses**

**Helps in smooth calving**

**Cattle & Buffaloes :**

50 gm. in morning &  
50 gm. in evening daily  
for 20 days during last  
month of pregnancy

**Presentation: 50g. (20 x50g Pack)**

An essential requirement before & after  
PREGNANCY

# Zenomin<sup>Gel</sup>

Calcium 6600 mg., Phosphorus 3400 mg.,  
Vitamin D3-32000 I.U., Vit. B12-400 mcg.  
Lepidium Sativum 200 mg./ 100 g.

Facilitates rapid & efficient absorption  
of calcium

Enhances serum calcium level within  
few minutes of oral administration

Maintains serum calcium level longer  
than IV fluids / oral solutions

**Direction for use :**

**Regular Use :** For Higher milk yield, administer one bottle  
per animal per day for 5-10 days

**To Prevent Milk Fever :** Give one bottle at the first sign of  
calving & give another bottle after 6 to 12 hours of post  
calving, repeat every 12 hours as needed

**Presentation : 300 ml.**

*A trusted & time-tested  
broad-spectrum antibiotic,  
which assures rapid therapeutic response*
